REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious the overall claimed invention of a device for detecting the flow of gas through at least one opening in an object, the device comprising: an outlet, located downstream of a chamber, and open to ambient pressure, a inlet and the chamber and the outlet being configured together for allowing passage through the device of the gas flow, and a pressure displaceable member having an inner face exposed to and contiguous with the interior of the chamber and an outer face exposed to the ambient pressure; the pressure displaceable member being a hinged member hingedly mounted along one end within the chamber such that the member is pivotally displaceable about the en as a result of a differential in respective pressures of the chamber interior and the ambient pressure, the displacement being indicative of the gas flow through the device.

2. The Examiner agrees with the Applicant's arguments that the prior art reference to Elam 3890967 does not read on the limitations of independent claim 1. Specifically Elam does not teach that a pressure displaceable member exposed to an interior of a chamber or an outer face exposed to the ambient pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
